Contents	1
Fundamental Guidelines – Suggestions	5
Basic Tips	6
<b>1</b> <b>Materials Tools &amp; Techniques</b>	<b>7</b>
History of Synthetic Resins	9
History of 3D Scanners	14
History of 3D Printers	15
<b>Modeling - Molding - Casting &amp; Replication Materials</b>	<b>17</b>
Synthetic Resins	17
Modeling, Molding and Replication Resins	18
Admixtures, Fillers and Reinforcement Materials for Resins	19
Aggregates and Fillers for Resins	20
Reinforcement of Resins With Glass Fabrics	24
Processing of Resins	26
Usual Technical Processing Instructions from Manufacturers	27
Resin Pigments	29
Mold-Releasing Agents for Resins – Application Procedures	32
Silicone Elastomers or Silicone Rubbers	35
Condensation and Addition-Curing Silicone Compared	34
<b>2</b> <b>Modeling</b>	<b>37</b>
Modeling	39
Classical Modeling	40
Transfer of the Points to the Clay Manikin	42
From Model to Mold	44
Plaster Waste Mold	45
Steps of Multiple-Piece Mold Making	47
Molding Processes of Multiple-Piece Molds	48
<b>Molding a Live Model - Body Silicones &amp; Alginate Rubber</b>	<b>58</b>
Molding by Immersion in Alginate Rubber	59
Making Mold by Casting Alginate Rubber	60
Molding with Body or Skin Silicone	63

<b>3D Modeling</b>	<b>75</b>
<b>3D scanning</b>	76
Techniques of Three-Dimensional Scanning	77
Contactless 3D Scanners	78
Structured White Light 3D Scanners	79
Reflection or Emission Scanning	79
Process of 3D Models	80
Software for 3D Processing	81
File Export	82
File Types	83
Slicing Software	85
<b>3D Printers</b>	<b>86</b>
Terminology of 3D Technology	90
Scanning - Processing - Printing	91
<b>3D Modeling Processes in Detail</b>	92
Scanning Using a Laptop or Desktop	93
Using the Smartphone App for 3D Scanning	94
3D Scanning and Editing on a Smartphone	98
Computer Surface Scan Processing	96
Full Body Model Scan	99
Processing with Slicing Software	101
Print with SLA Printer	103
Post-Processing	104
From 3D Printing Model to Final Artwork	105
Digital to Plaster Model Transfer Procedures	107
Mold Making through 3D Technology	111
Multiple-Part Mold through 3D Printing	113

<b>Molding</b>	<b>115</b>
<b>Silicone Rubber Molding</b>	<b>117</b>
Rubber Molding by Casting and Laminating Technique	117
Rapid, Easy, and Cost-Effective Silicone Molding	118
The Various Modes of Rapid, Easy and Cheap Application	119
Manufacture of Keys for Silicone	120
Relief Molding with Moldable Silicone Putty	118
Combination of Moldable Putty and Brush Application	121

# 3

Relief Molding by Brush Application Silicone	123
Combination of Brush Application Silicone with Plaster Multiple-Part Mold	125
Creating a Relief Mold by Silicone Pouring	128
Creating a Two-Part Mold by Silicone Pouring	129
Internal Mold for Reproducing a "Hollow" Copy	137
Two-Part Silicone Mold by Brush Application	139
<b>Double Sided Mold with Addition-Curing Silicone</b>	<b>143</b>
The Internal Mold Making	154

# 4

<b>Molding &amp; Casting with Synthetic Resins</b>	<b>167</b>
<b>Acrylic Resin - Applications</b>	<b>168</b>
Processing Acrylic Resin	172
Mother Mold Making with Acrylic Resin	169
Mold Making with Acrylic Resin	174
From the Flexible Model to the Rigid Mold	178
Replication by Lamination of Acrylic Resin	181
Placement of Pin Support	183
Application of Acrylic Resin - Bronze	188
Replication by Casting Acrylic Resin	191
<b>Polyurethane Resin - Applications</b>	<b>192</b>
Polyurethane Types	194
<b>Molding with Polyurethane</b>	<b>194</b>
Polyurethane Preparation	194
Molding of a Relief Model with Elastomer PU	195
Molding with PU Elastomer and Reinforcement Materials	197
Mold with a Combination of Flexible and Rigid Polyurethane	199
Master Mold by Casting of Rigid Polyurethane	200
Polyurethane, Replication by Casting	206
Replication of a Hollow or a Solid Object	210
Making Solid Core with Expandable Polyurethane	213
Molded PU with Ready Solid Core	214
Hollow Core Making with Acrylic Resin	217
PU Rubber Lamination (Brush Application)	218
Expandable Flexible Polyurethane Foam	223
Mold Making by Casting Rigid Polyurethane	223

# 4

<b>Epoxy Resin - Applications</b>	<b>229</b>
The Processing of Epoxy Resins	230
Epoxy Resin and Moisture	232
Casting Clear Epoxy with Fillers	233
Epoxy by Brush Application	235
The Polishing of Resins	237
<b>Transparent Resins - Liquid Glass or Crystal Clear</b>	<b>240</b>
Cast Liquid Glass	241
Casting Crystal Clear Epoxy Resin in a Double-Sided Mold	243
Creating Transparency with Liquid Glass	252
Creating Transparency with Sandpapers	254
<b>Polyester Resin – Applications</b>	<b>257</b>
Transparent Polyester Resin	258
Mother Mold Making with Polyester	259
Replication by Laminated Polyester	261
Application of Polyester by Casting	267

# 5

<b>Lifelike Silicone Figure</b>	<b>269</b>
<b>Making a Lifelike Silicone Figure</b>	<b>271</b>
Casting Silicone in a Rigid Mold	272
Core Making for a Lifelike Silicone Figure	276
Core Making Using Expanding Polyurethane	280
Molding Silicone SFX having Ready PU Core	281
Core Filling with Expandable Polyurethane Foam	285
Making a Lifelike Figure by Casting Silicone	289
Materials, Tools, and Simulation Aids	291
Διαδικασίες Προσομοίωσης (Life-Like Casting)	292
Procedures for Life-Like Silicone Casting	295
Analytical Procedures for Silicone Coloring	299
The Hair Addition Procedure	300
Silicone Mask Making	301
<b>Applications with Latex Rubber</b>	<b>305</b>
Application of Latex by Immersion	306
Latex Brush Application (Lamination) - Mask Making	308
Safety	315
Bibliography	320
